

Assurance that travels. Operations that do not.

A practical, offline way to collect consistent OT evidence across vessels, rigs, FPSOs and remote assets - without sending an assessor to every location or changing a running system.

ONE SECURE LOOP | TWO CLEAR ROLES

ELANTIS COLLECTOR

Approved read-only checks onboard or at the OT asset.

ELANTIS ASSESSOR

Central validation, policy baselines and human-approved findings.

LOCAL

Evidence collected where the asset operates

CONSISTENT

Comparable assurance across the portfolio

ACCOUNTABLE

Qualified people retain risk decisions

THE SALES PROPOSITION

Repeatable maritime and offshore OT assurance with less travel, less operational disturbance and stronger evidence continuity.

REQUEST AN ELANTIS EVALUATION

BUILT FOR OPERATIONAL REALITY

Collect locally. Assure centrally.

01

Scope

Define asset class, authorised checks and decision boundaries.

02

Collect

Technician runs approved read-only checks on Windows or Linux.

03

Transfer

Evidence is encrypted locally and moved through an authorised route.

04

Assure

Integrity is validated and evidence assessed against policy baselines.

05

Improve

Human-approved actions are tracked and reassessed over time.

WHAT THE PLATFORM ENABLES

- Consistent evidence across owned vessels, chartered assets, rigs and offshore installations.
- Comparable reporting across asset classes with clear exceptions and accountable ownership.
- No active network scanning, persistence, configuration changes or cloud dependency at the asset.
- Repeat assessments to verify remediation, monitor progress and maintain shared baselines.
- Central evidence-integrity validation and client-specific policy baselines.
- A controlled pilot on one representative asset before portfolio-wide rollout.

WHERE TECHWIZ FITS

Elantis scales the evidence-collection and assurance process across distributed assets. TechWiz can provide deeper offline analysis of exported firewall, router and managed-switch configurations within that wider assurance workflow.

OPERATIONAL GUARDRAIL

Elantis collects and organises evidence. It does not operate the asset, alter OT configuration, authorise risk decisions or replace SMS, flag, class, regulatory or competent-person obligations.
